

HANDRAIL INSTALLATIONS

Rail comes with 2 clips, 2 end caps, 2 brackets & screws.

Attach the 2 clips to the end of the handrail

Slide the end caps on each end & slide over to cover the clips & sharp edges

On the bottom lip of the handrail insert the ½" self tapping screws

Attach the 2 brackets to the rail 6" in from each end with the 1 ¼" self tapping screws

The rail is ready to attach to the wall:

Attach on an angle 33 to 37 degrees & 36" high from any step.

Screw into wall using a hammer drill with a 5/16" or 1/4" bit.
